3M Personal Safety Division
Safety Prescription Eyewear

Safety is at Work
Protective eyewear with prescription lenses

The power to protect your world.™
**Why 3M: Over 100 years of experience.**

3M pioneered bringing 3M Safety Prescription eyewear to the workforce.

The business that is now 3M Safety Prescription Eyewear pioneered the first safety prescription glasses in the early 1900s. For decades, 3M has provided business and industry with comprehensive safety prescription eyewear products and programs that are designed to help improve compliance and help with program administration.

Health and safety are the priorities in every work environment. When it comes to protective eyewear, 3M works hard to help improve compliance by offering diverse coatings, modern styles and greater comfort. 3M advanced coating technologies are designed to offer clearer vision with greater functionality and durability.

Choosing eyewear can be complicated; 3M is one of the only providers that offers a full range of protective and prescription eyewear – in addition to many value-added services, such as eyewear fit testing.

We can help you administer your program and we have teamed with a vast network of eyecare professionals to assist with product selection and fitting – either onsite in your plant, or offsite at one of more than 3,000 optical store locations. For convenience, safety, style, durability and versatility, 3M is the clear choice.

---

**Eye injuries at work are caused by:**

- **Not wearing eye protection.** Nearly three out of every five workers injured did not wear eye protection at the time of the accident.
- **Wearing the wrong kind of eye protection for the job.** About 40% of the injured workers found wearing some form of eye protection at the time of accident were most likely wearing protective eyeglasses with no side shields.
- **Flying particles.** Almost 70% of accidents result from flying or falling objects, or sparks striking the eye. Injured workers estimate that nearly three-fifths of such objects are smaller than a pinhead. Contact with chemicals causes one-fifth of the injuries.

**Eye injuries can be prevented by:**

- **Always wearing effective eye protection.** OSHA standards require employers to provide workers with suitable eye protection. To be effective, the eyewear must be properly fitted and appropriate for the type of hazard encountered.
- **Better training and education.** Workers injured while not wearing protective eyewear most often say they believed protective eyewear was not required by their regular job or situation. Even though the vast majority of employers furnish eye protection at no cost to employees, about 40% of the workers receive no information on where and what kind of eyewear should be used.
- **Maintenance.** Eye protection devices must be properly maintained. Scratched and dirty devices reduce vision, cause glare and may contribute to accidents, eye-related or otherwise. Scratched or damaged eyewear should be replaced immediately.

---

*DID YOU KNOW?*

The Bureau of Labor Statistics has some interesting facts about work-related eye injuries. For example, did you know that more than 1,200 workers each day suffer from eye injuries simply because they do not wear protective eyewear?

*Source for all statistical claims: Bureau of Labor Statistics*
How to Use This Catalog

No matter what your work force, job environment or budget may be, finding that right overall fit is crucial. This Safety Prescription Eyewear catalog offers participating opticians, safety managers and consumers alike a wide variety of choices in protection, comfort and style.

PURCHASE PROGRAMS

Based on Program Rules and employee co-pay requirements, please use this diagram to assess which program and product choices best suit your needs.

Anti-Reflective Coatings

AR coatings provide beneficial lens enhancements by increasing light transmission to 99.5%. Standard Polycarbonate lenses that are not treated with AR coating have a light transmission of 89%. Increased light transmission is especially beneficial in low light conditions, under fluorescent lighting and for night driving. 3M offers three levels of AR coating – Value AR, SuperCote™ AR and Scotchgard AR.

Value Anti-Reflective (AR) Coating
Value AR is a multi-layer anti-reflective coating with our standard scratch resistance coating as the base coating.

SuperCote Anti-Reflective (AR) Coating
SuperCote AR is a multi-layer anti-reflective coating applied to a base coating featuring our premium SuperCote scratch resistant coating. SuperCote AR is more scratch resistant than Value AR and is provided with a one year scratch warranty.

Scotchgard Anti-Reflective (AR) Coating
Features our premium multi-layer Anti-Reflective (AR) coating with superior scratch resistance and an easy clean stain resistant top coating that helps keep the lenses clean longer and enhances durability, giving the lens additional protection from dust, dirt and grime, water spots, paint splatter and fingerprints.

Lenses featuring either Scotchgard SC Easy Clean or Scotchgard Anti-Reflective coatings are provided with a premium microfiber cleaning cloth and covered with a one year scratch warranty.

Scotchgard SC Easy Clean Coating
Scotchgard SC Easy Clean coating features 3M’s SuperCote™ premium scratch resistant coating (SRC) as a base coating which provides superior scratch resistance to a standard SRC coating. We then add an easy clean stain resistant top coating that helps keep the lenses clean longer and enhances durability, giving the lens additional protection from dust, dirt and grime, water spots, paint splatter and fingerprints.

SuperCote™ Coating
SuperCote is our superior scratch resistant coating (SRC). It provides additional protection against scratches versus our standard scratch resistant coating (standard SRC is automatically provided on all Polycarbonate and Plastic CR39 lenses offered by 3M). SuperCote comes with a one year scratch warranty and each pair is accompanied by a microfiber cleaning cloth.

Anti-Fog Coatings
Our AF coating is a permanent anti-fog coating on both the front and back lens surface.

Transitions lenses help your eyes adjust to changing light better than they would on their own.

All Transitions lenses block 100% UVA/UVB rays.

Transitions everyday adaptive lenses are right for any age.

• 9 out of 10 people who try Transitions LOVE them
The moment your lenses keep pace with changing light — and your life.
**PhotoFusion® self-tinting lenses by ZEISS.**

Fast dark. Fast clear. Eyeglasses that adjust to any light condition — full sunlight, indoor lighting and everything in between. PhotoFusion by ZEISS lenses do it all — and do it fast.

**Outdoors/sunny**

**Outdoors/ slightly cloudy**

**Indoors**

**Outdoors/rainy**

Your Benefits
- Fast reaction to changing light conditions
- Comfortable vision in all light conditions
- 100% solar UV protection
- Constantly high self-tinting performance
- A natural stylish look

Available in all ZEISS digital lens styles.

---

**LifeRx light-responsive lenses**

**Comfort and Convenience**
LifeRx light-responsive lenses provide comfort by adjusting to various levels of direct UV light. They provide convenience by allowing you to see well indoors and out without switching glasses.

**Protection**
LifeRx light-responsive lenses provide protection by blocking 100% of harmful UVA and UVB rays.

**Style**
LifeRx light-responsive lenses are crystal clear indoors so people see your eyes, not a tinted color.
AVAILABLE IN MORE MATERIALS AND TREATMENT COMBINATIONS THAN ANY OTHER PROGRESSIVE LENS

ONE CLEAR CHOICE, ONE EASY FIT

Starting from advanced lens design technology and a desire to attain optimum wearer comfort in all viewing zones were the design principles that brought the IMAGE progressive to life. Eye-path tracing technology has been utilized to analyze and understand what the wearer sees in all viewing areas, in all prescriptions, in many different lifestyle activities.

IMAGE provides stabilized viewing zones in all prescriptions, ensuring the reading area is not compromised as the add power increases. With a fitting height of 18mm, IMAGE boasts one of the widest distortion free distance zones in the industry, which is an essential attribute for a quality progressive design.

Benefits of Image Progressive Lenses

- Flexible design suitable for small frames or large fashion frames
- Award-winning lens design that offers a smooth power progression
- Available in more materials and treatment combinations than any other progressive
- One of the widest distortion-free distance zones in the industry

NuPolar® Polarized Lenses
- Improved visual comfort and color contrast
- Blocks blinding glare
- Blocks 100% of UVA and UVB rays
- World’s most trusted brand of polarized Rx lenses

Trilogy® Lenses (made with Trivex® material)
- Crisp, clear vision - significantly less chromatic aberration than other lightweight materials
- Lightweight - at least 20% lighter than regular plastic lenses, and typically at least 10% lighter than even high index materials
- Safe - impact resistance many times the FDA requirement, with better optics than polycarbonate
- Thin - as thin, or thinner than, other “thin and light” materials
- Blocks 100% UVA and UVB rays

Transitions® Drivewear® Lenses
- Uniquely combine two of the most advanced technologies found in the eyeglass industry today: Transitions® Photochromic Technology and NuPolar® Polarization
- Photochromics adjust to varying light conditions - even behind the windshield of a car
- Polarized to block blinding glare and 100% of UVA and UVB rays
- Provides safe and comfortable vision to varying weather conditions

Varilux Comfort DRx™ Provides the Right Lens for the Right Job

- Uncompromised vision, Near, Far and In-Between
- Your new safety lenses will be easy to focus
- You will have fast adaptation

Move Beyond Traditional Lenses and Choose — Varilux Comfort DRx™ Lenses!

Best-Selling Popular Choices With Versatile Fit

V1000
WRAPAROUND COMFORT
Whether working indoors or out, the V1000 frame offers wrap-around styling and close-fitting comfort. With its convenient integrated side protection and high visibility reflective temples, the V1000 frame provides you greater safety for those times when extra protection is needed.

Found on page 26 of catalog, D Collection.

ZT200
With its ultra-lightweight frame construction, the ZT200 offers advanced comfort and a solid fit — as well as excellent protection in a sporty, stylish design.

Found on page 27 of catalog, D Collection.

D490
Contemporary fashion with dramatic lines and stylish colors, D490 provides a comfortable and attractive option for men and women.

Found on page 26 of catalog, D Collection.

TRX
With its stainless steel design, TRX safety prescription eyewear keeps you in style while helping keep you protected.

Found on page 26 of catalog, F Collection.
Polarized lens option shown.
New Products

ZT35 — ZERO TOLERANCE FOR IMPERFECTION

The ZT35 is 3M’s latest addition to our popular ZT collection. Featuring solid protection with thermoplastic elastomer (TPE) seals to enclose the eye, this safety prescription eyewear is as versatile as it is durable. Removable TPE seals and temples offer the ability to customize your frames to your needs and comfort.

Found on page 27 of catalog, D PLUS Collection.

ZT25 — HIGH-WRAP EYEWEAR

The ZT25 collection was designed to instill confidence. With its wrap style and foam seal, the ZT25 adds comfort and protection to a secure fit. High visibility reflecting temples make you more conspicuous at both dusk and night, providing greater safety for those times when you’re at greater risk.

Found on page 27 of catalog, D Collection.

ZT35 Features

- SOFT NOSE PADS
- REMOVABLE THERMOPLASTIC (TPE) ELASTOMER SEAL
- IMPACT-RESISTANT POLYCARBONATE LENS (RECOMMENDED)
- 3M’S PERMANENT ANTI-FOG COATING IS AN EXCELLENT OPTION TO ADD TO CLOSE-FITTING EYEWEAR LIKE ZT35
- SOFT THERMOPLASTIC (TPE) ELASTOMER TEMPLE
- REMOVABLE TEMPLE WITH INTERCHANGEABLE STRAP
- 3M CONFIDENCE
URBAN 7
Protection in a cool, modern frame.
With today’s popular wide-temple design, these stylish frames make a bold statement and bring a contemporary look to work.
Found on page 21 of catalog, F Collection.

URBAN 8
Edgy design with sleek profile.
Solid in construction, the high-style Urban 8 offers an edgy design for the workplace.
Found on page 21 of catalog, F Collection.

ATTITUDE 3 AND ATTITUDE 4
Ultralight construction with a bold attitude.
The unisex Attitude 3 and Attitude 4 deliver a straight browline for a fresh new look. With sturdy built lightweight metal frames, these glasses offer solid protection and lasting durability.
Found on page 19 of catalog, G Collection.

When it comes to safety prescription eyewear, 3M has a fit for nearly every face.
Because no two faces are alike, eyewear is not one-size-fits-all. At 3M, fit matters – that’s why we work hard to design and offer more frame styles to fit your entire workforce. No matter the age, gender, or ethnicity, we feel confident you’ll be able to select a style of eyewear that fits your needs – and your face.

PURCHASE PROGRAMS
The choice has never been more clear.
On the following pages you’ll find an abundant selection of safety prescription eyewear. To best use this catalog, it’s important to factor your unique needs into the decision-making process. Keep in mind not only the diversity of your workforce, job environment, and protection requirements, but also your employee’s preferences for style, comfort, and versatility. Style, fit and comfort help bridge and enhance employee acceptance and compliance of your important eye protection policies.
To help make your selection process even easier, consult this buyer program diagram. And for your added convenience, 3M has teamed with a nationwide network of more than 3,000 participating Eye Care Professionals that can professionally fit your eyewear at their office, or your worksite location.
Designed with critical specifications for fit, form and function, our G Collection features titanium frames and lightweight designs to deliver the ultimate in confidence, comfort and style.
