

NEW MAXIM™ SPLASH GOGGLE

OVER-THE-GLASSES MODEL
ALSO AVAILABLE

THE MAXIMUM IN STYLE, COMFORT AND OPTICAL CLARITY No other goggle blends the style of form with the safety of function like the Maxim Splash Goggle. The low profile, and sleek design complement facial shapes. The advanced DuoSoft polymeric shroud ensures enhanced comfort at every "touch point" including forehead, cheeks and nose. Plus, the excellent coverage and optical grade clarity of the panoramic distortion-free lens provides advanced protection.

MAXIM SPLASH GOGGLE – THE NEW MAXIMUM.

Beyond the Standard™

NEW MAXIM™ SPLASH GOGGLE

No other goggle in the industry has more style, comfort and advanced performance features.

LOW PROFILE, HIGH STYLE.

Enhanced design erases the “boxy look” of yesterday’s goggles and offers wearers an attractive design appeal to help promote compliance.

WIDE ANGLE LENS WITH OPTICAL GRADE CLARITY.

Wide lens offers wearers an extensive sightline with a superior peripheral range without distortion. Made of tough, Duralite® polycarbonate, with 99.9% UV protection. Replacement lenses available.

DUOSOFT SHROUD FOR ULTRA-COMFORT.

Soft polymeric materials and an advanced molding process help ensure long term facial comfort at all “touch points” – cheeks, forehead, and nose.

DURABLE & LIGHT WEIGHT FRAME.

Lightweight, protective frame provides firm structure and support to help maintain goggle’s shape and provide optimum fit.

ENHANCED VENTING REDUCES FOGGING.

High volume indirect ventilation channels surround the goggle frame to allow maximum air flow for reduced fogging and cooler wear.

ADJUSTABLE HEADBAND.

Headband angle can be adjusted for task specific needs, wearer preference, or wearer facial profiles.

DX™ COATING RESISTS FOG, SCRATCHES, AND MOST CHEMICALS.

The low profile model features DX anti-fog hard coat. The O-T-G model features Anti-Fog coating only.

MEETS ANSI Z87.1-2003 AND CSA Z94.3 STANDARDS.

Visit www.maximsplash.com for more information.

OVER-THE-GLASSES PROFILE.

Unlike most other goggles, an over-the-glasses model is available for workers requiring the use of prescription eyewear.
