

NEW

SHAPED FOR COMFORT. GRIPPED FOR FIT.

Another No Roll Solution From E•A•R.

New Push-Ins with Grip Rings are ready to wear right out of the pack – without roll down. The unique cone shape, made of patented E•A•Rform foam, inserts easily and “molds” to the ear canal for extra comfort. It also seals for extra protection with an NRR of 30 dB. Plus, the built-in Grip Rings are designed to “hold” the plugs in position. So all the performance and comfort is maintained – all day long.

The easier earplug for easier compliance.

E•A•R® Push-Ins™ Earplugs with Grip Rings

Another Choice In No Roll Plugs.

E•A•R Push-Ins Earplugs revolutionized the industry. Their “right out of the pack” use eliminated the time-consumption and hygiene concerns of roll down foam earplugs. Now, we’re making this great idea even greater with the new shape and performance of E•A•R Push-Ins with Grip Rings.

Shaped For Comfort.

Why the cone shape? This innovative design has proven to fit a wide range of ear canal sizes and shapes. By using the no-touch stem, the foam cone can be inserted deeply within the canal to form an effective low-pressure seal against noise. This “moldable” shape, combined with the ultra-softness of E•A•Rform foam, helps provide all day comfort.

E•A•Rform foam is a derivative of a foam developed for NASA shuttle seats. It softens with body temperature for ongoing comfort.

Gripped For Fit.

When earplugs slip, attenuation levels can slip. That’s why we developed Grip Rings. Integrated right into the foam, the Rings are designed to help wearers position the plugs for best protection. The result? An optimal fit – that remains optimal.

Tested For Highest Protection – NRR 30 dB.

The E•A•R Push-Ins with Grip Rings are not just another choice in no roll earplugs. They are the best choice for highest attenuation. In fact, the cone shape, E•A•Rform foam, deep stem insertion, and Grip Rings combine to achieve the highest level of protection for No Roll earplugs – NRR 30dB*. None are simpler. None are better.

E•A•R Push-Ins with Grip Rings – another leading advantage in hearing protection.

How to Order

E•A•R Push-Ins with Grip Rings are available corded or uncorded. Dispenser boxes are available with 200 pairs in polybags.
