

# QuickFit®

Full-Face Mask Respirator in a Turn Key Kit!

The revolutionary QuickFit®, which provides respiratory and eye protection, goes on with a turn of the silver handle (QuickDial™) and comes off with a pull on the handle. No hassling with buckles and straps!

- Easiest on and off, even with work gloves on!
- No straps, buckles, or snaps to adjust!
- NIOSH Approved

Easy-On

Twist to Seal

Pull to Release

Easy-Off

The QuickFit® full face mask respirator provides eye, face, and respiratory protection all in one product. A full face mask respirator, which seals all around the face, is designed to provide a higher level of respiratory protection than a half mask respirator. According to the Occupational Safety and Health Administration (OSHA), the federal agency that establishes regulations for respiratory protection use, a properly fitted full face mask respirator is 5 times more protective than a half mask respirator:

Table 1 Assigned Protection Factors\*

Type of Respirator	Quarter Mask	Half Mask	Full Facepiece
Air Purifying	5	10	50

\*An excerpt from Table 1 of the OSHA 29CFR1910.134 Respiratory Protection Standard.

**Whenever a job calls for an air purifying respirator, the best protection is a full face mask respirator.**

The QuickFit® comes in a great display kit which highlights the best feature of the QuickFit. . . the easy-on-and-off QuickDial™.

It also shows the kit contents which includes everything your customer needs to protect their lungs and eyes while painting, spraying, sealing, coating, gluing, staining, and sanding.

The respirator helps protect against particulates, sprays, mists, pesticides, fertilizers, and solvents in paint, sealers, coatings, lacquers, enamels, thinners, and glues. This type of respirator is used in construction, autobody, agriculture, and general industry.
