SMARTLENS™
PHOTOCHROMIC EYEWEAR

LIGHTENS AND DARKENS
WITH CHANGING OUTDOOR
LIGHT CONDITIONS

**CHANGING OUTDOOR LIGHT CONDITIONS
DOESN'T REQUIRE CHANGING EYEWEAR ANYMORE.**

SmartLens does all the changing – automatically. The lens is “UV reactive”, so it responds to the amount of Ultraviolet (UV) light it receives. It lightens or darkens as needed... going from clear to dark in just seconds. Why spend the money to buy multiple pairs of eyewear?

- Durable Frame with Nylon Brow and Magnesium Alloy Temples
- Tough Polycarbonate Lens Absorbs 99.9% UV
- Spring-hinged Temples for Narrow/Wide Fit
- Soft, Adjustable Nose Bridge for All Day Comfort

Beyond the Standard™
www.aosafety.com

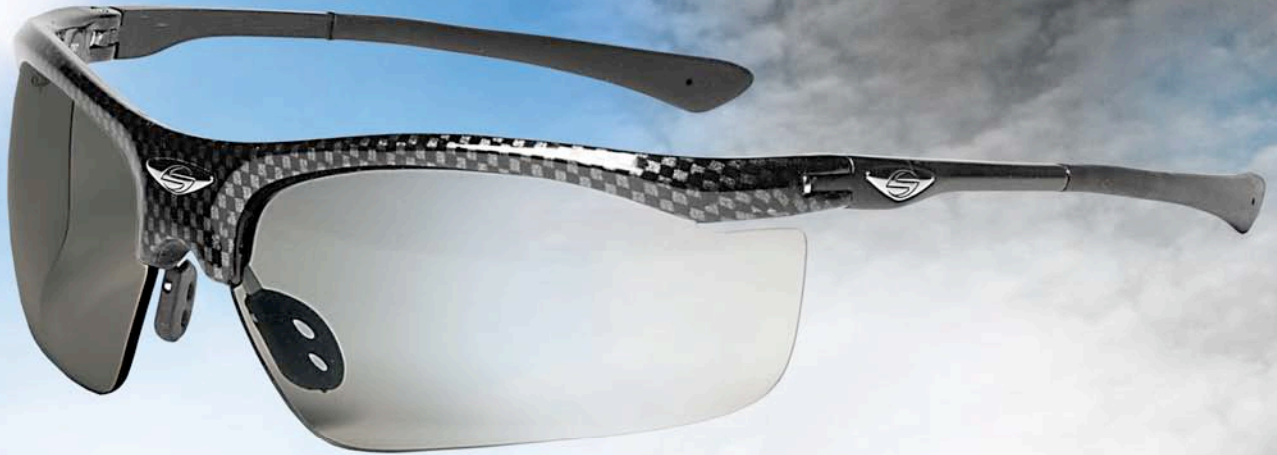

- Abrasion Resistant Hard-Coat Extends Lens Life
- Frame Design Has Stylish Carbon Fiber Pattern
- Meets ANSI Z87.1-2003 High Impact Standards
- Meets Traffic Signal Recognition Requirements of ANSI Z80.3

new SMARTLENS™ PHOTOCHROMIC EYEWEAR

IT CHANGES SO WORKERS DON'T NEED TO.

The days of buying indoor and outdoor safety eyewear are over.

**Let there be light. Let there be dark.
Let there be SmartLens.**

**CHANGES FROM DARK
TO CLEAR IN 35 SECONDS**
Clear state allows 77.5%
light transmission

**CHANGES FROM CLEAR
TO DARK IN 8 SECONDS**
Reduces sun glare allowing
just 22% light transmission

- Meets ANSI Z87.1-2003 High Impact Standards
- Abrasion Resistant Hard-Coated Lenses
- Meets Traffic Signal Recognition Requirements of ANSI Z80.3

BE SMART WITH SMARTLENS.

Safety directors should assess their particular workplace and make all SmartLens wearers aware of the time required for the lens transition. Special care should be taken when moving from outdoors to indoors. Outdoor temperatures may affect lens transition time.
