Got Dust?

Get Protection and Comfort with Fectoggles™.

Now You Can Have The Performance Of An Impact Goggle With The Comforts Of A Spectacle.

Protecting eyes from dust, grit, grinder shavings and other particulates is critical in many environments. But, wearing goggles can be uncomfortable for extended wear. And spectacles with sideshields can be less than effective.

That's why AOSafety created Fectoggles™ Protective Eyewear.

Different Sizes For Different Faces.

Available in medium and large, Fectoggles combine the sight and comfort advantages of spectacles with the impact protection of goggles. So now there's a lightweight, wearer-friendly and effective eye protector for high-particulate areas.

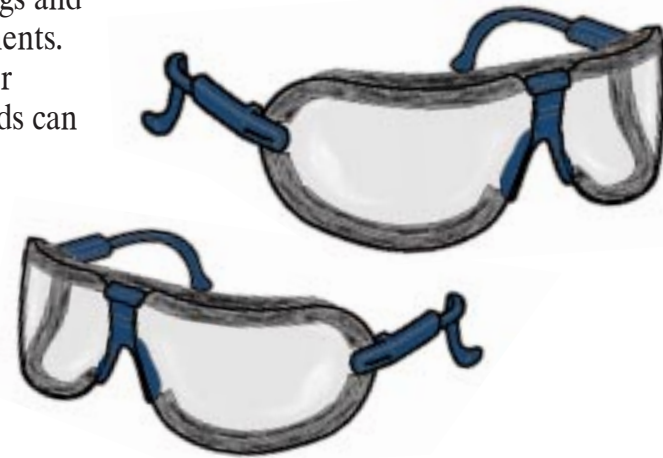

See the difference. Feel the comfort.
Trust the performance of
AOSafety Fectoggles™ Protective Eyewear.

Optional Elastic Band

Also available with fire retardant, braided, elastic band for a snug, comfortable fit.

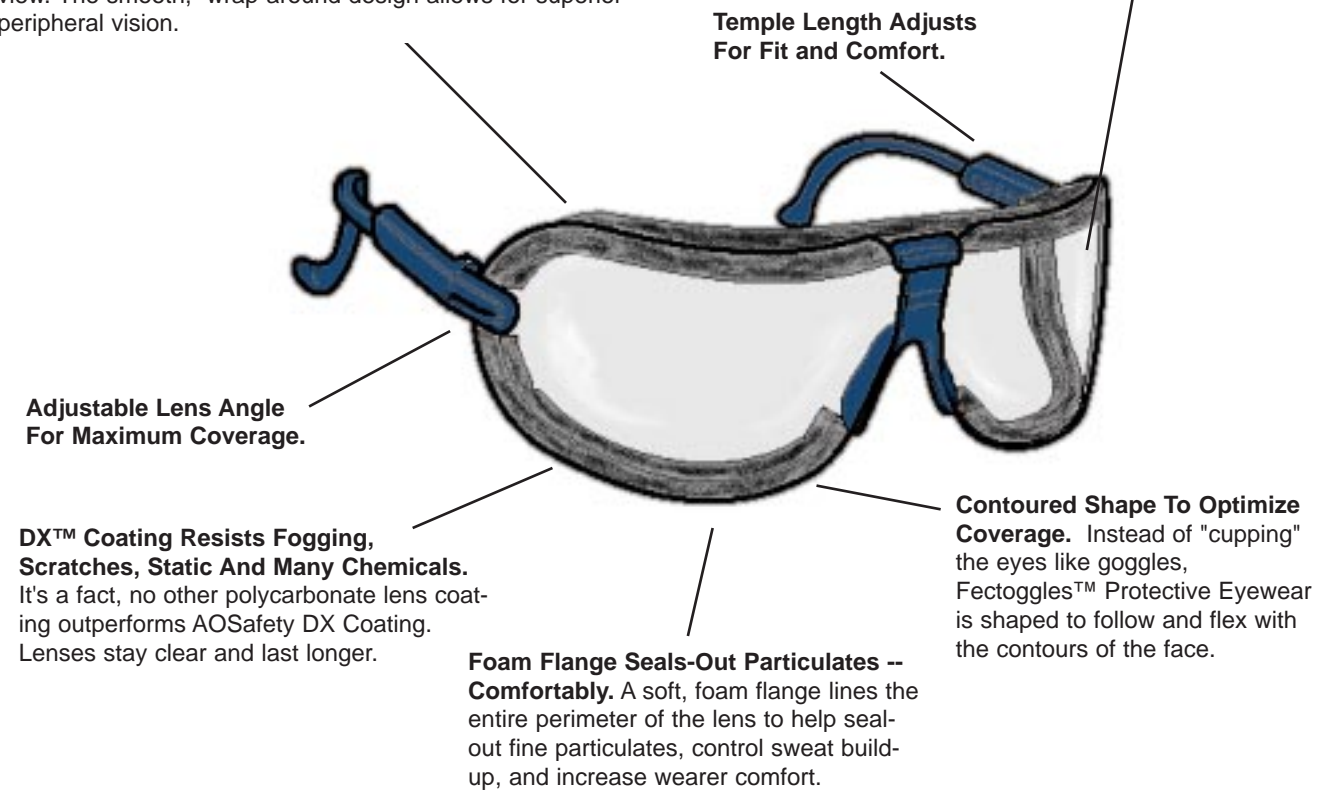

Exclusive REAX® HOOKZ™ Eyewear Retention System

HOOKZ easily attaches to temples and comfortably wraps around the ear to help give Fectoggles a custom fit. The need for productivity-robbing readjustments is eliminated.

Innovative "Fectoids®" Lens Provides Wide, Distortion-Free View. Many goggles can block and limit a wearer's field of vision. But Fectoggles™ Protective Eyewear is designed to actually expand it. The unique lens has absolutely no parting lines to obstruct or distract a wearer's view. The smooth, wrap-around design allows for superior peripheral vision.

Lightweight And Tough Duralite® Polycarbonate Construction. The one-piece lens is made of durable, impact resistant polycarbonate and weighs less than many goggles.

Temple Length Adjusts For Fit and Comfort.

Adjustable Lens Angle For Maximum Coverage.

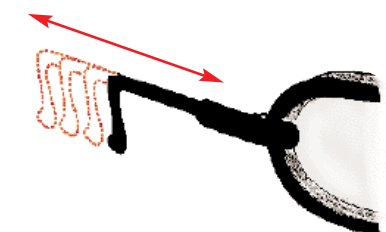

DX™ Coating Resists Fogging, Scratches, Static And Many Chemicals. It's a fact, no other polycarbonate lens coating outperforms AOSafety DX Coating. Lenses stay clear and last longer.

Foam Flange Seals-Out Particulates -- Comfortably. A soft, foam flange lines the entire perimeter of the lens to help seal-out fine particulates, control sweat build-up, and increase wearer comfort.

Contoured Shape To Optimize Coverage. Instead of "cupping" the eyes like goggles, Fectoggles™ Protective Eyewear is shaped to follow and flex with the contours of the face.

Adjustable Lens Angle For Maximum Coverage. Choose from three different positions. Adjustments are quick and easy to make...even while wearing.

Temple Length Adjusts For Fit and Comfort. Four different settings help minimize temple pressure and help prevent "nose slides."

AOSafety has done it again. Developed a product that not only meets performance needs -- but meets the combined advantages of two eye protection products.

Say goodbye to clunky, view-robbing goggles and to eyewear with less than effective sideshields. Say hello to Fectoggles™ Protective Eyewear -- the lightweight, comfortable and effective way to protect eyes from dust, grit grinder shavings and other particulates.

Fectoggles™ Meet ANSI Z87.1 Impact Standard For Goggles.
NOT INTENDED FOR USE IN CHEMICAL SPLASH ENVIRONMENTS.

See back cover for ordering information.
