

NEW

LOWEST PRICE. SOFTEST FOAM.

**HIGHEST
NRR.**

New E·A·Rflex 28™. The most protection and lowest price of any semi-aural protector.

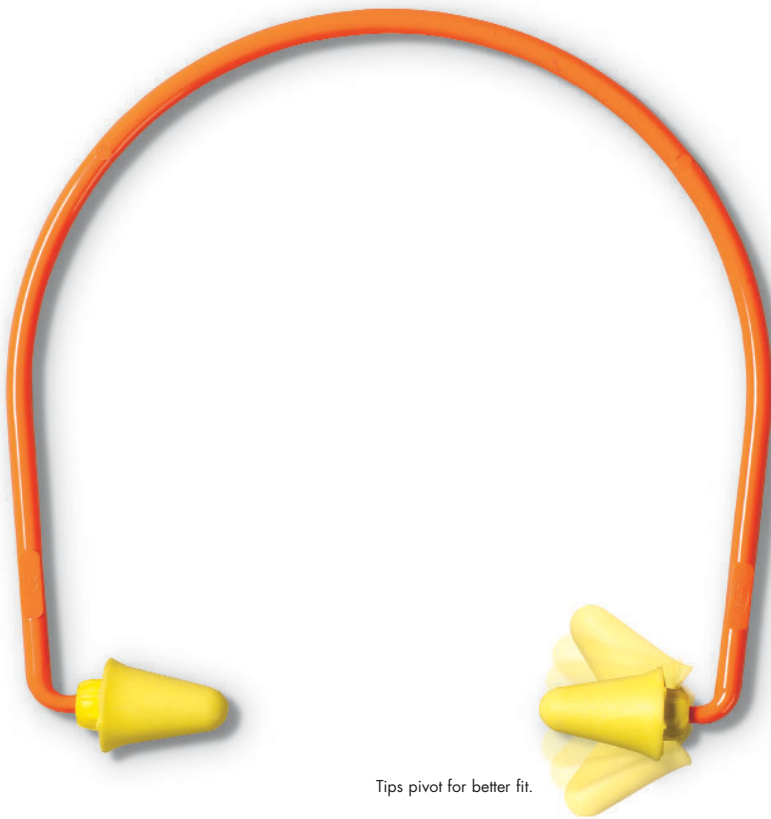

With an **NRR of 28 dB**, E·A·Rflex 28™ has the highest protection in its class. The exclusive E·A·Rform™ foam tips are softer. They pivot for proper fitting. And the comfort band has high visibility for nighttime safety. What could be better? A price up to 10 percent lower than the competition, that's what. **Save money. Save hearing. NEW

E·A·Rflex 28™ Semi-aural Hearing Protector

Tips pivot for better fit.

The New Level Of Performance.

Never before has a semi-aural hearing protector been able to provide a Noise Reduction Rating (NRR) as high as 28 dB. Until now. Now, by using a combination of design features, E·A·Rflex 28™ not only delivers this superior protection, it offers wearers more comfort and a better fit, too.

An Innovation In Comfort—E·A·Rform™ Foam.

The tapered tips of E·A·Rflex 28™ are made of an exclusive new product—E·A·Rform™ foam. This hybrid foam formulation reacts to the body temperature, warms, conforms and actually becomes softer with wear time. Just think, a hearing protector that keeps feeling and fitting better as the day goes on.

Better Fit With A Twist.

Unlike many other semi-aural devices, E·A·Rflex 28™ tips pivot for easier and better fits. Also, once in the ear, they move with the wearer so they're less likely to become dislodged and break the seal against noise.

Look And See The High-Viz Band.

Ideal for airport and road crews, the bright orange band has the high visibility advantage for added safety. It's flexible so it gently wraps around the head without "clamping around" it. Plus, it's so lightweight it's almost undetectable.

E·A·Rflex 28™ Semi-aural Hearing Protector another leading advancement in hearing protection.

How to Order

E·A·Rflex 28™ hearing protectors are packaged 1 unit per polybag, 10 polybags per carton, 10 cartons per case. Replacement pods are packaged 10 pods per box.
