

NEW

YOU WANT TO MAKE SURE EARPLUGS FIT.

DRAW THE LINE.

EARsoft SuperFit

EAR Classic SuperFit

E·A·Rsoft™ SuperFit™ and E·A·R® Classic® SuperFit™ Earplugs eliminate the guesswork.

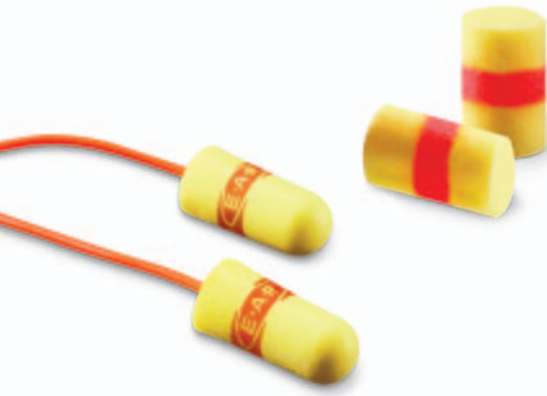

Is an earplug in properly or not? Just look. If you can see the "red ring" the earplug's not inserted deeply enough in the ear canal to provide optimum protection **NRR up to 33dB**. It's that simple. See the line and draw the line on proper fit.

NEW E-A-Rsoft™ SuperFit™ and E-A-R® Classic® SuperFit™ Earplugs

Surest Fit.

A great idea just got better. Because now the most comfortable earplug with the industry's highest protection level can take the guesswork out of proper fitting, too. The key is the patented "fitting ring," an E-A-R exclusive.

Highest Protection.

When the plug is inserted into the canal so that no ring is visible, the best fit is achieved. One look shows wearers and supervisors if the plug is providing the best possible protection—NRR 33dB. It's simple and sure.

Greatest Comfort.

The soft, smooth, tapered shape makes E-A-Rsoft the industry's most comfortable earplug. It's an even more comfortable feeling when you know they're fitting correctly.

Proven Design.

The E-A-R Classic SuperFit with its proven cylindrical design features an improved formula for increased softness, all-day comfort and a secure fit in a wide range of ear canals.

**E-A-Rsoft™ SuperFit™ and E-A-R® Classic® SuperFit™ Earplugs—
more leading advancements
in hearing protection.**

How the Fitting Ring Works.
